

# SCENIC RIVERS ENERGY COOPERATIVE

## POLICY BULLETIN NO. 10-4C

**SUBJECT:** Line extension to subdivisions

**POLICY:** The objective of the Scenic Rivers Energy Cooperative (SREC) is to provide electric service to all future members in its service area at the lowest possible cost consistent with the Cooperative's current rates. This policy was adopted so as not to financially injure the existing members and at the same time provide reliable electric service to our future members.

**RESPONSIBILITY:** Manager and employees

**PROCEDURE:** SREC will extend a primary line to, and within, a subdivision under the following conditions:

1. There will be a \$200.00 non-refundable fee required in advance of any activity on the part of the cooperative for completing a new service extension. This fee will be applied to the line extension cost if and when the new service is constructed.
2. The developer requesting a line extension will pay in advance, a contribution in aid of construction based on the co-op's applicable costs for all primary lines installed.
3. The rate for a line extension within a developed area is \$5.50 (~~\$6.50~~) per foot.
4. Under no conditions will construction begin until the contribution in aid of construction is received unless prior arrangement are agreed upon and approved by management.
5. The developer will provide a complete plat plan of the developed area or subdivision and a right-of-way easement for installation of electric lines within the development or subdivision.
6. The Cooperative reserves the right to determine whether to serve the subdivision or development with overhead or underground lines.
7. If additional lines or members are connected within five (5) years from the date of original construction of the line extension, the developer(s) providing

the initial “contribution in aid of construction” shall be reimbursed an equitable amount by the cooperative.

The Cooperative, at its option, may reduce the amount of the “contribution-in-aid of construction” to reflect future electric system needs or other system improvements that may result by reason of the line extension. (Subject to the Board approval.)
